

The Go Programming Language

Package ini

```
import "github.com/yilin0041/service-computing/readini/ini"
```

[Overview](#)[Index](#)

Overview ▼

Index ▼

```
type Config
func SetConfig(filepath string) *Config
func Watch(filename string, listener ListenFunc) (Configuration *Config, err error)
func (c *Config) GetValue(sec string, key string) (string, error)
func (c *Config) SetValue(section, key, value string) bool
type ListenFunc
type Listener
```

Package files

[ini.go](#)

type Config

Config: ini的结构体

```
type Config struct {
    // contains filtered or unexported fields
}
```

func SetConfig

```
func SetConfig(filepath string) *Config
```

SetConfig: 初始化一个设置文件

func Watch

```
func Watch(filename string, listener ListenFunc) (Configuration *Config, err error)
```

Watch:查看更改,若有更改则调用用户函数然后返回最新的更改

func (*Config) GetValue

```
func (c *Config) GetValue(sec string, key string) (string, error)
```

GetValue:通过section和key来查找一个value

func (*Config) SetValue

```
func (c *Config) SetValue(section, key, value string) bool
```

SetValue:通过section和key来设置一个value

type ListenFunc

ListenFunc: 实现接口方法 listen 直接调用函数

```
type ListenFunc func(string)
```

type Listener

Listener:一个特殊的接口,用来监听配置文件是否被修改,让开发者自己决定如何处理配置变化

```
type Listener interface {  
    // contains filtered or unexported methods  
}
```

Build version go1.10.
